WHAT TO CONSIDER WHEN CHOOSING A REGULATOR

Major considerations in the selection of a regulator are listed here. Within the requirements of your specific application, use this catalog to find the regulator that matches your parameters. Our standard products are only a starting point. We can modify or create a control that will solve any application problem. Detailed information is available through your local TESCOM representative.

HANDKNOB

Large handknob provides easy, low torque pressure setting. Wrench or screwdriver adjust options on some models.

VENTING

Self-venting feature enables relieving of the outlet pressure when the handknob is turned in the “decrease” direction.

Captured venting configuration includes extra port to pipe away expelled fluids from a regulator’s vent valve.

Non-venting feature available for hydraulic or other applications where venting is not desirable.

FLOW CAPACITY – C_v

C_v is a measure of regulator flow capacity. The flow coefficient refers to the flow of one GPM of water at one PSI drop across the main valve. The coefficient for gaseous service must be determined from the ratio of inlet to outlet pressure.

BODY MATERIALS

Brass, aluminum or stainless steel (Type 300, 316) and others.

OUTLET PRESSURE RANGES AVAILABLE

Starting at 28” Hg. Vac. to 15 PSIG, ranging up to 300-20,000 PSIG.

LOADING – Spring, Dome, Air Actuated, Electronic

Loading refers to the method used to balance the outlet pressure. Spring loading is used with direct acting regulators with handknob adjustment. Dome loading is most often used in high flow, quick response type applications. Air Actuator provides outlet pressures up to 15,000 PSIG with a signal of only 100 PSIG. A TESCOM electronic controller is another loading option (p.11).

PANEL MOUNTING

Standard on some models. Extra option on others.

SENSING – Diaphragm or Piston

Diaphragms provide sensitive and accurate regulation for outlet pressure ranges up to 500 PSIG. Piston sensors provide high strength integrity for high outlet pressures up to 20,000 PSIG.

INLET PRESSURE RANGES

Sub-atmospheric to 20,000 PSIG.

PORTS

Sizes: 1/8" to 1"
Types: NPT (all models), SAE, Aminco, MS33649, Slimline, BSP, welded fittings.

MAIN VALVES – Balanced and Unbalanced

Balanced design is used to reduce the effect of decaying inlet pressure and in certain models provides increased flow capacity. Unbalanced valve offers simplicity and economy.

ADDITIONAL CONSIDERATIONS

- Gauge ports, 1/8" or 1/4" NPT
- Temperature range
- Corrosion resistance
- Welded connections
- Soft goods -Buna-N, PCTFE, Teflon®, Viton-A®, Vespel® and EPR.

Custom Pressure Reducing & Back Pressure Regulators

Cartridge Regulator (BB Series)

42 MW Welded Diaphragm Instrument Isolator (shown with the SJS Series regulator)

Air Actuator (26-2000 Series)

Cartridge Regulators

- Cartridge style externally threaded regulators are designed to be easily installed in a manifold block
- Obvious benefits include: reduced piping, elimination of connections, reduced space requirement, ease of service
- Can be furnished in a wide variety of pressure reducing or back pressure styles
- Contact factory for application assistance

Differential / Tracking Regulators

- Designed to provide a controlled pressure which is the sum of a signal (reference) pressure and a bias pressure (bias can be positive or negative)
- Applications include: automatic pressure compensation for mechanical (pump) seals, control of fugitive emissions, reduction of breathing gases in commercial or military diving

SJS Series Regulator

- Maintains accurate differential pressure when incorporated into a double seal system
- Tracks upsets in system pressure and decreases downtime by increasing seal life

42 MW Welded Diaphragm Instrument Isolator

- Isolates and protects the regulator from corrosive process media
- Intended for use with our wide range of tracking regulators
- Assists in the control of pressure in fugitive emission and/or mechanical seals applications

Air Actuators

- Available for a wide range of pressure reducing and back pressure regulators
- Allows regulator to be remote actuated by an air signal from an external air source or by one of TESCOM's electronic controllers
- Control pressures may vary from 20 to 20,000 PSIG
- Ratios between actuator pressure and control pressure are available from 3:1 to 150:1
- Compared to conventional spring loading, air actuation offers improved regulator performance

Alternative Fuels

20-1200 High Pressure Hydrogen

20-1400 High Flow / Low Pressure

44-6000 In-Line

Product Series /Features	Inlet Pressure (maximum)	Outlet Pressure Ranges	Flow Capacity	Body Material
20-1000 Series: Compressed Natural Gas <ul style="list-style-type: none"> • Balanced main valve minimizes inlet pressure fluctuations • Piston sensed - highly reliable • Water heat jacket standard 	3,600 PSIG	0-500 PSIG	$C_V = .5$	Aluminum
20-1200 Series: High Pressure Hydrogen <ul style="list-style-type: none"> • Nickel-plated aluminum • Large piston sensor • All regulators tamper-proof 	5,000 PSIG	0-500 PSIG	$C_V = .5$ 316 SST	Aluminum
20-1400 Series: High Flow / Low Pressure <ul style="list-style-type: none"> • Diaphragm sensed - highly sensitive • Dome load spring bias ± 2 PSIG • Captured bonnet design for safety 	250 PSIG	0-190 PSIG	$C_V = 1.6$	Aluminum
44-6000 Series: In-Line High Pressure <ul style="list-style-type: none"> • Balanced main valve design • Positive shutoff seal • Captured bonnet available • Patent pending 	10,000 PSIG	120, 150, 300 PSIG (all pre-set)	$C_V = .3$	316 SST

Valves

30-1100 Shutoff Valve

CC Metering Valve

FL7000 Flow Limit Valve

VA & VG Air-Operated ON/OFF Valves

VA Valve - toggle actuated

Product Series/Features	Operating Pressure (maximum)	Flow Capacity	Body Material
30 Series: Shutoff Valves <ul style="list-style-type: none"> Globe or angle pattern Built-in metallic stop prevents over-torquing - reduces seat wear 30-1100 Series: available with metering capability (long stem optional) Bi-directional flow (all models) 	10,000 PSIG	30-1100 globe: $C_V = .28$ 30-1100 angle: $C_V = .49$ 30-1300 globe: $C_V = 1.57$ 30-1300 angle: $C_V = 2.30$ 30-1200 globe: $C_V = 8.0$ 30-1200 angle: $C_V = 10.0$ 30-1400 globe: $C_V = 20.0$	300 SST
CC Series: Metering Valve <ul style="list-style-type: none"> Precise control at very low flows For liquid or gas applications 20+ turns from shutoff to full open Non-rotating stem reduces seat wear 	Full vacuum to 10,000 PSIG	$C_V = .00005$ $C_V = .00125$	316 SST
FL7000 Series: Flow Limit Valve <ul style="list-style-type: none"> Designed to stop flow automatically when flow exceeds a pre-set limit Flow range: 0-6 SCFM (N_2@1000 PSIG) Protects downstream personnel & equipment from exposure to hazardous media 	100-1,000 PSIG 300-2,500 PSIG 600-5,000 PSIG		316 SST
VA & VG Series: Air Operated ON/OFF Valves <ul style="list-style-type: none"> Normally open or normally closed Balanced main valve - reduces required actuation pressure (30-60 PSIG) Compact package Toggle actuator optional Solenoid valve actuation (pneumatic assist) optional 	6,000, 10,000 15,000, 20,000 PSIG	VA: $C_V = .75$ VG: $C_V = 2.0$	Brass or 316 SST
VJ Series: Cartridge Valves <ul style="list-style-type: none"> Bi-directional flow Built-in metallic stop Globe or angle pattern O_2 compatible design 	6,000 or 10,000 PSIG	angle: $C_V = .49$ globe: $C_V = .28$	Brass or 316 SST
VL Series: $C_V=10$ <ul style="list-style-type: none"> Balanced main valve - reduces required actuation pressure Normally closed In-line flow configuration U.S. patent pending 	6,000 PSIG	$C_V=10$	316 SST

VJ Bi-Directional Shut-off Valve

VL Series $C_V=10$ In-line Valve

Clean Pharmpure™ Regulators for Biotech & Pharmaceutical

PH-1800 Low Pressure
Very High Flow

PH-2200 - Low Flow

PH-2600 - Low Flow

PH-3200 - Medium Flow

All Pharmpure™ regulators are compliant with the MJ and SF sections of BPE-2005. Clean Service Certification option is available.

Regulator Series /Features	Inlet Pressure (maximum)	Outlet Pressure Ranges	Flow Capacity	Body & Finishes

Custom Manifolds & Systems

Custom Test Stand

TESCOM's Systems Group designs and builds unique pressure and flow control solutions. We provide standard designs and custom remedies from the component level up – capabilities not found with other system integrators.

- Our engineers offer in-depth understanding of fluid control. We've designed pressure controls, manifolds and assemblies for more than forty years.
- Controlling gases and liquids across a wide range of pressures and flows, our systems are capable of 60,000 PSIG.
- Utilizing manifold technology, TESCOM systems minimize potential leak paths, save space and service time while reducing cost.
- We offer a wide array of mechanical and electro-mechanical systems from charging carts to test stands with custom software.
- Meeting stringent domestic and international performance requirements has become standard operating procedure at TESCOM.

Automatic Changeover for UHP Hydrogen Service

Burst Test Stand - Hydro-static testing of car radiator hoses

Aircraft Charging Cart (3 bottle version)

Electronic Pressure Controls

ER3000 Digital Pressure Controller

ER300X Series Digital Pressure Controller

- Precise accuracy: $\pm .1\%$ FSO! (ER3001 in Internal Feedback Mode)
- Features controlled outlet pressure from 0-100 PSIG as a stand alone unit
- Compatible pressure regulators available offering vacuum to 20,000 PSIG control
- Selectable setpoint signal source:
 - External analog, digital RS485, downloadable profile
- Selectable feedback signal source:
 - Internal 0-100 PSIG sensor, external analog
- Selectable failsafe features
- NEMA 4X enclosure
- CE and CSA approved
- Two enhanced (extra cost) versions, ER3000 FI and FV, offer additional analog/digital inputs allowing the user even more sophisticated control. These models also include analog sensor output.
- Free Windows® tuning and interface software provided
- RS485 convertors, power supplies and pre-wired models also available

Electronic Pressure Controls - continued

ER3040 Series

ER3000E Series Explosion-Proof Control

- FM approved enclosure for Class 1, Division 1, Group B, C and D.
- Same features and benefits as ER3000 (above)

ER3040 Series

- Features of the ER3000 with OEM base, no cover
- Not available in Explosion-Proof

ER3000 / 26-2000 Series - High Accuracy, High Pressure Control

- Designed for applications where high accuracy and reliability are critical
- Choice of outlet pressure ranges to 20,000 PSIG
- Excellent for calibration systems

ER3110 Compact Integrated Unit

ER3020 Series - High Pressure, Low Flow Integrated Systems

- Integrates with 26-1000 Dual Piston Regulator to achieve 10-9000 PSIG in 395 milliseconds
- Choice of outlet pressure ranges to 10,000 PSIG
- Gas or liquid applications
- Segregated venting
- Flow capacity: $C_v=0.06$
- Other integrated regulators available

269-529 Low Pressure/
High Flow Regulator

ER3100 Series - High Flow Control

- Integrates with 44-4000 venting regulator
- Choice of 500 or 900 PSIG outlet ranges
- Flow capacity: $C_v=0.7$ or 2.0
- Available in brass or stainless steel

ER3110 Series - Compact Integrated Unit

- Integrates with 44-5200 regulator, standard options available
- Features identical to the ER3000 (shown on page 11)
- Choice of outlet pressure ranges to 500 PSIG
- Reference pressure: 100 PSIG
- Flow capacity: $C_v=0.06$ or 0.15
- Venting or non-venting

269-529 Series - Low Pressure/High Flow Pressure Regulator

- Maximum inlet pressure: 300 PSIG
- Controlled outlet pressure to 100 PSIG, some models up to 300 PSIG
- NPT ports from 1/4" to 2-1/2"
- Flow capacity: C_v values up to 45
- Exceptional low pressure control throughout flow range

70-2000 Motorized Actuator

70-2000 Series Motorized Actuator

- 24 VDC motorized actuator provides remote adjustment of regulator setpoint
- Adaptable to 26-1000, 26-1600, 26-1700, 26-2300, 54-2000 and 54-2100 Series Regulators
- Variable speed control with adjustable limit stops to prevent over-travel

Pressure Transducers

- Ideal for use in ER3000 applications where an external feedback is required
- Provides extremely stable and repeatable hydraulic and pneumatic pressure measurements
- .1%, 0.25% and 0.5% accuracy available
- Choice of 4-20 mA, 0-10 VDC versions
- Wide choice of pressure ranges (including sub-atmospheric)

Pressure Transducers

Gauges & Filters

Gauges

Mini In-Line Filters

TESCOM Manufacturing & Distributor Network ... *a global presence!*

Industrial Controls & Systems Group

Industrial Controls and Systems Group

Elk River, Minnesota USA

TESCOM Industrial Controls provides standard and custom pressure control solutions. We design, manufacture and sell a wide range of regulators and valves to a diverse global market. The Systems Group designs and manufactures leading technology pressure systems, assemblies and manifolds.

High Purity Controls

High Purity Controls

Elk River, Minnesota USA

High Purity Controls designs and manufactures ultra-clean pressure regulators, valves and integrated gas system components for the semiconductor manufacturing & fiber optic industries.

TESCOM Europe

TESCOM Europe

Selmsdorf, GERMANY

Located to directly meet the needs of the European customer, TESCOTM Europe is a complete design, manufacture and service facility offering a full range of pressure control solutions.

TESCOM Shanghai

TESCOM Shanghai

Pudong Shanghai, CHINA

Located to directly meet the needs of the Asian customer, TESCOTM Shanghai is a complete design, manufacture and service facility offering a full range of pressure control solutions.

Global Support and Distribution

TESCOM distributor support centers are located in most major cities worldwide. More than 100 locations provide application assistance and quality TESCOTM product. TESCOTM sales offices are located in California, New Jersey, Scotland, South Korea and Singapore.

For a distributor location near you, call **800-447-1250** or **763-241-3238** or visit our web site: **www.tescom.com**.

**Ultra-high purity pressure controls are available
from our HIGH PURITY CONTROLS group.**

We are your global partner in precision pressure control.
